Physical education	10
Other	11

STATE POLICIES SUMMARIES

The following provides an overview of the policies being raised in states over the last year.

Safety & Health

Concussions and other injury prevention

Comprehensive. Concussion bills have been around long enough now that we are starting to see states go through a reauthorization process.

- **Illinois, Missouri, and North Carolina** have major bills that would revise concussion policies in those states. **New York** has a bill that would extend rules applying to public schools to private schools.

Training. There are a fair number of states that have proposed changes in safety training protocols, particularly around concussions - who needs to get training, frequency of training, and what the training covers.
